Overview

Access the Mobile Internet via Yahoo! Keitai (SoftBank's mobile portal site). Browse PC websites using PC Site Browser.

6
Internet

Transmission & Information Fees
Some web contents automatically connect to different pages incurring transmission fees. Information fees may also apply.

About Security
Handset supports SSL/TLS (encryption protocols for Internet transmissions of important/sensitive information). Root certificates necessary to use SSL/TLS are saved on handset by default.

- SSL (Secure Sockets Layer) and TLS (Transport Layer Security) protocols encrypt data before transmission. Connect via SSL/TLS to safely transmit personal information, credit card numbers and internal corporate information, and guard against eavesdropping, data manipulation, impersonation and other Internet risks.
- When a security notice appears, subscribers must decide for themselves whether or not to open the page. Opening secure pages constitutes agreement to the terms of SSL/TLS usage. SOFTBANK MOBILE Corp., VeriSign Japan K.K., Cybertrust Japan Co., Ltd., Entrust Japan Co., Ltd., GlobalSign K.K., RSA Security Japan Ltd. and Secom Trust Systems Co., Ltd. cannot be held liable for any damages associated with the use of SSL/TLS.

* When **Warning Messages** is set to **ON**, an alert appears each time handset connects to a website using PC Site Browser.

Connecting to Yahoo! Keitai

1

Web Page

2 Select an item \Rightarrow

Repeat this step until the page you want to view opens.

3 to exit the Internet \Rightarrow YES \Rightarrow

Navigating Pages

Scrolling Pages

If a page extends beyond view, use to scroll page.

Press or to jump between sections of the page.

Viewing Frames

When a page includes multiple frames, select frames to view.

1 \Rightarrow Select a frame

2 \Rightarrow Frame In \Rightarrow

Navigate through the frame as you would a page.

To exit frames, press , select *Frame Out* and then press .

Open Linked Page in Multi Window

Open up to five pages simultaneously. Press to toggle pages.

1 [Web Page] \Rightarrow Select a link \Rightarrow

The linked page appears in a new window.

Multi Window

The page toggles each time you press .

Tip

- To open pages in Multi window other than linked pages:
[Web Page] \Rightarrow \Rightarrow Window Operation \Rightarrow \Rightarrow Open New Window \Rightarrow \Rightarrow Bookmark, Enter URL or Yahoo! Keitai \Rightarrow \Rightarrow Specify page to open \Rightarrow
- To close opened pages:
[Multi] window \Rightarrow \Rightarrow Window Operation \Rightarrow \Rightarrow Close Window \Rightarrow \Rightarrow YES \Rightarrow
- Use to return to previous pages stored in cache. Return through pages opened in Multi window to close.

Jumping to Next or Previous Page

Once opened pages are stored in a temporary storage area (cache). Press , select *History Back* or *History Forward* and press to go back to the previous page or proceed to the next page, without connecting to the network as long as the pages are stored in the cache.

- Network connection is made when the cache is full.
