Overview

Voice call and video call are available on handset.

3 Calling

Emergency Calls

Your location is automatically reported to the corresponding agency (police, etc.) when you place emergency calls (110, 119 or 118) with Softbank 3G handsets.

(Emergency Location Report)

931N reports Location Information based on GPS signals. When GPS is unavailable, positioning is calculated based on radio station signals.

- Registration and transmission fees do not apply.
- Positioning accuracy is affected by location and signal conditions. Always provide your location and purpose on the phone.
- Location Information is not reported when:
 - The call is placed without Caller ID (e.g. prefixed by 184). However, the corresponding agency may obtain your Location Information in a life threatening situation.
 - Abroad (International Roaming)
- Location Information via GPS is unavailable when:
 - Dial Lock is set (P. 4-3)
 - Positioning is calculated via radio stations.

Emergency calls are possible even while some handset restrictions are active.

- Restrict Dialing (P. 2-25)
- Keypad Lock (P. 4-4)
- Set Max Cost Limit (P. 14-13)
- Emission OFF Mode (P. 4-6)
- PIN1 Code Entry Set (P. 4-2)
