#### Transmission & Information Fees

Some web contents automatically connect to different pages incurring transmission fees. Information fees may also apply.

#### About Security

Handset supports SSL/TLS (encryption protocols for Internet transmissions of important/sensitive information). Root certificates necessary to use SSL/TLS are saved on handset by default.

- SSL (Secure Sockets Layer) and TLS (Transport Layer Security) protocols encrypt data before transmission. Connect via SSL/TLS to safely transmit personal information, credit card numbers and internal corporate information, and guard against eavesdropping, data manipulation, impersonation and other Internet risks.
- When a security notice appears, subscribers must decide for themselves whether or not to open the page. Opening secure pages constitutes agreement to the terms of SSL/TLS usage. SOFTBANK MOBILE Corp., VeriSign Japan K.K., Cybertrust Japan Co., Ltd., Entrust Japan Co., Ltd., GlobalSign K.K., RSA Security Japan Ltd. and Secom Trust Systems Co., Ltd. cannot be held liable for any damages associated with the use of SSL/TLS.

\* When **Warning Messages** is set to **ON**, an alert appears each time handset connects to a website using PC Site Browser.
